📁 PROFESSIONAL EXPERIENCE

NoBroker

Software Development Engineer

Jan 2022 – Present

- Revamped and optimized customer-facing pages via refactoring and optimization initiatives, resulting in a noticeable surge in self-checkout adoption.
- Implemented impactful SEO strategies to enhance page indexing and bolster organic traffic to the website.
- Introduced Server-Side Rendering (SSR) to speed up page loading, leading to a better user experience across the board.
- Consistently monitored website performance metrics and actively addressed areas for improvement.
- Teamed up with colleagues from various departments to devise and execute solutions that effectively meet business requirements for functionality and scalability, leading to reduced operational costs.

📁 PROJECT CONTRIBUTOR

Rental Agreement 🔗

Revamped and improved user interface and experience to increase website traffic, improve lead generation, and enhance overall customer satisfaction.

Sales Agreement 🔗

Implemented comprehensive end-to-end functionality, ensuring responsive web interfaces are compatible across various platforms, featuring server-side rendering, and designed with SEO in mind.

Admin Dashboard

Developed user/customer management systems, role-based access controls, and added features to improve service efficiency.
